*****FOR IMMEDIATE RELEASE*****

Rossum Electro-Music Previews SATELLITE Universal CV Generator

Eurorack Module Lets Control Forge Owners Multiply the Power of Their Presets and Sequences

(Scotts Valley, CA, January 19, 2016) -- Rossum Electro-Music today announced they will be previewing their Satellite Universal CV Generator at the 2016 NAMM show in Anaheim from January 21 through January 24.

Satellite is a compact 12HP module that can be loaded with all of the presets and preset sequences from a Control Forge and then function as a completely stand-alone CV generator. Once the presets and preset sequences are transferred from the Control Forge (via a patch cord connection), Satellite no longer requires any connection to a Control Forge.

With one or more Satellites, Control Forge owners can take advantage of all of their presets and sequences in multiple cabinets or even different systems

Multiple Satellites can be programmed from the same Control Forge and synced together via their Gate inputs to create complex polyphonic sequences and modulation contours.

Satellite will be available this spring from Rossum Electro-Music dealers worldwide.

More Satellite information can be found at the Rossum Electro-Music web site: <http://www.rossum-electro.com/products/satellite/>

About Rossum Electro-Music

Rossum Electro-Music creates uniquely powerful tools for electronic music production. Driven by the creative and technological vision of electronic music pioneer Dave Rossum, Rossum Electro-Music is the culmination of Dave's 45 years of designing industry-defining instruments and transformative technologies. Today, Dave and
